

Article Overview

Leading European suppliers of standard cable trays include Eurostrut, Spina Group, DKC Europe, Eurotray, and Niedax Group, offering EN-compliant ladder, perforated, wire-mesh, and closed-bottom trays.

Key Suppliers and Offerings

Eurostrut provides durable cable trays made of hot-dip galvanized steel or stainless steel, suitable for indoor and outdoor applications. Their range includes distribution trays, NATO-type trays, and perforated designs that reduce overheating risks, with flexible widths, heights, and configurations for industrial and marine use. Quotes can be requested directly via their webshop . Spina Group (Schiavetti Tekno) is an Italian manufacturer offering stainless steel, galvanized, and wire cable trays in ladder, perforated, closed, and wire-mesh types. Their systems ensure strength, corrosion resistance, and compliance with EN and UL standards. They provide standard widths like 300 mm and custom sizes, along with accessories such as elbows, junctions, supports, and covers for indoor and outdoor environments . DKC Europe supplies a comprehensive range of cable tray systems for civil and industrial infrastructures, including energy protection and transport solutions. Their products are designed for both standard and heavy-duty applications, supporting safe and organized cable routing . Eurotray Support Systems specializes in cable management systems capable of carrying heavier cable loads, suitable for vertical applications, data centers, food manufacturing plants, and industrial environments. Their systems include trays, mounting supports, connection parts, and fittings, designed for low, medium, and high voltage cables . Niedax Group (mentioned in industry overviews) is a German-based provider with over 50,000 products, including ladder and perforated trays, wire mesh trays, and custom cable management solutions. They focus on durability, environmental compliance, and ease of installation for industrial, commercial, and infrastructure projects .

Considerations for Selection

- o Material: Choose between galvanized steel, stainless steel, or aluminum depending on corrosion resistance and weight requirements.
- o Tray Type: Ladder trays for heavy-duty and ventilated support, perforated trays for heat dissipation, closed trays for cable protection.
- o Standards Compliance: Ensure EN compliance for safety, durability, and compatibility with European installations.
- o Accessories and Modularity: Check availability of elbows, junctions, supports, and covers for complete installation flexibility.
- o Customization: Many suppliers offer custom widths, lengths, and configurations to fit specific project needs. These suppliers provide reliable, EN-standard cable trays suitable for industrial, commercial, and infrastructure applications across Europe.

Supplier of standard European-style cable trays

We are a full service provider, specialising both in cable management for ceilings, walls and floors and in technical consulting,

Our profiles are compatible with all cable tray and cable ladder types, guaranteeing perfect alignment, stability, and load distribution.
