

Article Overview

Swedish fireproof cable trays typically range from \$2 to \$25 per meter, depending on material, type, size, and surface finish.

Pricing Overview

The cost of fireproof cable trays depends on several factors, including the material used, surface treatment, tray dimensions, and supplier margins. Common materials include galvanized steel, stainless steel, aluminum, and halogen-free plastics, with galvanized steel being the most cost-effective and stainless steel the most expensive due to corrosion resistance and durability requirements .

Cost Factors

- o Material Type: Steel is cheaper, stainless steel and aluminum are pricier.
- o Surface Treatment: Hot-dip galvanizing (HDG) increases durability but adds to cost; powder coating provides wear protection.
- o Tray Design: Ladder trays are more expensive than perforated or mesh trays due to higher load capacity .
- o Dimensions: Wider or thicker trays require more material, increasing the price.
- o Order Quantity: Bulk orders can reduce per-meter costs by 20-40%.
- o Shipping and Installation: Heavier trays cost more to transport, and labor costs vary by region .

Supplier Options

Several European and international suppliers provide Swedish fire-retardant cable trays, including:

- o Eurotray - Offers cable management systems for industrial and commercial applications .
- o AESTUVER - James Hardie Europe GmbH - Specializes in structural fire protection and cable duct systems .
- o EASYCONNECT - Durable mesh cable tray systems suitable for fire-resistant installations .
- o Ekabel24 - Provides a wide range of high-quality cable trays, including halogen-free and fireproof options compliant with DIN EN 61537 .

Practical Tips

- o For bulk projects, contacting suppliers directly for a custom quote is recommended, as prices can vary significantly based on specifications and delivery location.
- o Consider material and coating carefully to balance cost with fire resistance and longevity.

o Switching from ladder to perforated trays can save up to 15% if load requirements allow . By evaluating these factors and consulting suppliers like Eurotray or Ekabel24, you can obtain precise pricing tailored to your project requirements.

Cable tray designed to offer continuous support of cables Rated load of 12.5kg per metre over a 1.5m Span
1500mm Trapeze
