

Technical Requirements for Ceramic Flanged Insert Engineering Drawings

Preview

All flanged fittings meet or exceed ASME B16. 5 requirements for pressure-temperature ratings, materials, dimensions, tolerances, marking, and testing. In modern engineering, Computer-Aided Design (CAD) and 3D modeling have become essential tools for designing and manufacturing flanges. Whether you are working with ASME, DIN, or other flange standards, having precise CAD drawings and 3D models ensures accuracy, efficiency, and seamless integration. If you are looking for class 900 flanges 2-1/2" or smaller, please refer to our class 1500 drawings. 5, they have the same dimensions. NEW! Ceresist flange adapters are very versatile and extremely cost-effective wear-preventative items. Heavy wall thickness ceramics are installed to prevent virtually any type of wear caused by ID mis-matching, yet are able to survive in the most aggressive services. 8%.
