

What is the span of galvanized cable trays in Australia

Preview

Cable tray can be manufactured up to a maximum length of 3 meters in increments of 50mm or even down to lengths of less than meter (again in increments of 50mm). EzyStrut offers some of the strongest cable trays in their classes, and produces them to a very high structural and visual standard. Cable trays offer continuous support of cables, are lightweight, quick and straight forward to install just about anywhere, and generally mean that changing cabling. EzyTray is a sensible cable tray choice for all general purpose electrical cabling installations in both commercial and industrial environments. It replaces traditional methods such as conduit piping or manual bundling with a more accessible, modular system. Using undersized. ET3 Cable Tray G Product Details Cable Laying Depth Side Wall Cable Laying Widths Standard Length 40mm 50mm 150-600mm 3 metres The EzyStrut ET 3 cable tray provides premium performance for commercial and light industrial electrical projects The tray offers a 40mm cable laying depth, With widths.
