

What is the unit price of indoor optical cable in Botswana

Article Overview

Indoor fiber optic cables in Botswana typically range from approximately \$0.05 to \$1.50 per meter, depending on fiber type, strand count, and construction.

Current Market Prices

For example, on Ubuy Botswana, a 6-strand single-mode indoor/outdoor fiber optic cable (1000 feet spool) is available, optimized for long-distance transmission and high-speed connectivity, though the exact price is listed on the website at checkout . Similarly, a 2-fiber multimode indoor distribution cable (1000 feet spool) is also available for indoor network installations .

General Pricing Guidelines

- o Per Meter Pricing: Indoor fiber optic cables generally cost \$0.05 to \$1.50 per meter, with single-mode cables slightly cheaper than multimode for standard indoor applications .
- o Fiber Count: Higher strand counts increase the unit price. For instance, a 2-core cable is cheaper than a 24-core cable.
- o Cable Construction: Indoor riser-rated cables are less expensive than plenum-rated or armored cables. PVC or LSZH jackets are common for indoor use and are cost-effective compared to outdoor-rated jackets .
- o Wholesale vs Retail: Bulk purchases reduce the per-meter cost, with wholesale prices ranging from \$0.09 to \$1.52 per foot, while retail prices can range from \$1 to \$6 per foot, depending on specifications .

Factors Affecting Price

- o Fiber Type: Single-mode (OS2) is used for long-distance networks and is slightly cheaper per meter than multimode (OM3/OM4), which is common in data centers.
- o Environmental Rating: Indoor cables are cheaper than outdoor or direct-buried cables.
- o Length and Packaging: Spools of 1000 feet or more provide better value for large installations. In summary, indoor optical cables in Botswana are priced based on fiber type, strand count, and construction, with typical unit costs ranging from \$0.05 to \$1.50 per meter, and specific products available online through local distributors like Ubuy .
