

What s the lowest price for fiber optic cable

Article Overview

The minimum price for fiber optic cable is approximately \$0.09 per foot for wholesale bulk purchases of simple single-core cables.

Fiber optic cable pricing varies widely depending on type, fiber count, construction, and application. For basic single-mode or FTTH drop cables, wholesale bulk prices can start as low as \$0.09 per foot, while retail prices typically range from \$1 to \$6 per foot depending on strand count and jacket type . Simple indoor simplex or duplex cables may cost \$0.05 to \$0.30 per meter (roughly \$0.015 to \$0.09 per foot) in some bulk configurations . Factors affecting price include:

- o Fiber Type: Single-mode fiber is generally cheaper per foot than multimode fiber, but requires more expensive equipment .
- o Fiber Count: Higher strand counts increase cost; a 12-strand cable may cost around \$0.50 per foot, while a 24-strand cable can reach \$1 per foot .
- o Construction and Rating: Indoor riser-rated cables are cheaper than plenum-rated or armored cables, which can range from \$0.50 to \$5 per foot for harsh environments or direct burial .
- o Installation Environment: Underground or aerial installations add labor and conduit costs, increasing the effective per-foot price . For budget-conscious buyers, selecting standard, off-the-shelf fiber grades and minimizing specialized components can help achieve the lowest material cost. Pre-terminated assemblies, patch cables, or custom-built cables will cost more due to factory termination and connector types . In summary, while retail prices for fiber optic cable typically start around \$1 per foot, the absolute minimum for bulk, simple cables can be as low as \$0.09 per foot, with costs rising based on fiber count, cable type, and installation requirements .

Buyers typically pay for fiber optic cable by length, fiber type, and installation complexity. Main cost drivers include

Fiber optic cable is a vital component of every network--whether it's an outside plant (OSP)

Higher prices on premium plans: While cable internet providers often offer a wide range of slow plans at

What is fiber optic internet? Fiber internet is a type of broadband connection that uses light to

We offer fiber optic cable by the foot in a variety of fiber types and strand counts to meet your network
