The AQ6361 offers exceptional measurement speed, space efficiency, and superior optical performance, delivering the precision and reliability that customers need. Six models are lined up for different applications. Yokogawa's optical instruments capture these properties with high precision, helping engineers and researchers understand how light behaves in real systems. Widely adopted across industries, Yokogawa optical solutions deliver consistent, correlated data from design and prototype validation to. Yokogawa offers solutions to measure both traditional and cutting-edge optical components and systems, serving the increasing demand for high capacity fiber lines, and new component technologies. Looking for more information on our people, technology and solutions? What's next for our planet?Yokogawa releases entry-level OTDR with many high-end features: Yokogawa is adding an entry-level model, the AQ1000, to its range of OTDR (Optical Time-Domain Reflectometer) test instruments. yokogawa Test Equipment available for sale, rent, trade-in or lease. Improved dynamic range and event detection, and newly equipped with a simple OTDR.

Optical Wavelength Meters Ideal for Testing Optical Devices and Transceivers Yokogawa wavelength meters set the benchmark for absolute wavelength

Yokogawa is adding an entry-level model, the AQ1000, to its range of OTDR (Optical Time-Domain Reflectometer) test instruments.

Yokogawa Test & Measurement announces the release of the AQ7290 Series optical time domain reflectometer (OTDR), a highly reliable and accurate optical fibre field test instrument that will

Cable probes are especially suited to temperature measurement in machinery, laboratory equipment, Yokogawa offers different types of cable probes. Learn more here. | Yokogawa Test&Measurement

Because the OTDR is also used for the installation of optical fibers prior to the installation of transmitters, it is must be driven by battery for many hours so that

Simply pressing one single button, the AQ1000 initiates an OTDR measurement, detects and comprehensively characterizes network events with PASS/FAIL judgment based on user-defined

About Us Since its foundation in 1915, Yokogawa has been recognized as a technology leader. Annually, Yokogawa reinvests nearly a quarter billion dollars in research and development, much of

Built with proven laboratory grade technology, it delivers stable, repeatable, and accurate measurements required in photonics R&D, new product introduction,

Yokogawa Optical Cable Testing Machine

Yokogawa offers solutions to measure both traditional and cutting-edge optical components and systems, serving the increasing demand for high capacity fiber lines, and new component technologies.

Optical Test Equipment Leading-Edge Solutions for Accurate Optical Measurements Light is understood through measurement of its spectrum, wavelength, power, and reflections. Yokogawa's optical

Accelerating Telecom and Datacom Production The AQ6361 OSA is purpose-built for high-volume optical communication production, delivering the compact form

Unparalleled Optical Performance The AQ6380 OSA is the highest performance optical spectrum analyzer from Yokogawa. Its excellent optical wavelength

AQ6361 Optical Spectrum Analyzer High-Performance Optical Spectrum Analyzer AQ6361 for Production The AQ6361 offers exceptional measurement speed, space efficiency, and

Optical Test Equipment Yokogawa offers solutions to measure both traditional and cutting-edge optical components and systems, serving the increasing demand for high capacity fiber lines, and new

An optical spectrum analyzer (OSA) measures and displays the optical power distribution over a wavelength range. Yokogawa OSAs are recognized for

We also provide high accuracy measuring instruments that include oscilloscopes, power analyzers, and optical test equipment. OpreX Measurement is a category
